

## Burn-Up List

*Prioritized by 2 factors; due date and estimated completion time(least time investment to most time investment).*

1. Verify all work has been completed correctly for previous week
2. Submit Week 3 Project & Portfolio
3. Watch our Go-To Training video to understand assignment expectations for this week.
4. Complete & submit all information gathering and non-submission assignments.
5. Participate in this weeks "Call to Action - Growth" class discussion and interact with my peers.
6. Complete Career Module.
7. Complete Week 4 SWOT follow-up.
8. Complete Week 4 being paid for your work.
9. Complete Week 4 month in review.
10. Upload all work to my repository.

For the final week, my goals will be as follows. First, I will focus on completing on all of my assignments to perfection to make up for an assignment I failed to complete on time in the previous week. Second, after I have completed all school related work I will turn to my extra-curricular pursuits of practicing my web development skills by working on my blog; I have already completed the front page design for the most part, now it is time to move on to learning how to do some of the back-end development. Finally, I will complete my course evaluation, giving my instructor a good review, because she has been nothing but helpful throughout my time in this course.
